

D'Matek Current Products & Services

Current offer and capability map by division — V1

Purpose

This document records D'Matek's current products, services and active capabilities by division, separated from the broader future opportunity universe. It is intended to give commercial, brand and operating work a clear picture of what D'Matek can actually offer today versus what is being developed or explored.

Status language: **Current** = actively offered/operating; **Build** = planned or being developed; **Partner/Outsourced** = delivered through external capability; **Future** = strategic direction rather than a current offer.

01 — D'Matek Infrastructure

Current / Active

- Wi-Fi deployment
- Network infrastructure design and deployment
- Network architecture
- LAN/WAN implementation
- Routing and switching
- Connectivity / internet setup
- Network equipment deployment
- Firewall/network security infrastructure
- VoIP deployment and setup
- Managed Wi-Fi where applicable

Build / Developing

- Managed network services
- Network monitoring and management
- SD-WAN
- Enterprise connectivity packages
- Broader connectivity services
- Fibre/last-mile partnerships and deployment capability

Future Direction

- ISP
- Telecommunications/connectivity services
- Network-as-a-Service
- Wireless-as-a-Service
- Potential larger D'Matek Networks business

Customer outcomes

- Reliable connectivity; properly engineered networks; Wi-Fi that works; scalable infrastructure; communications infrastructure that can support business operations.

02 — D'Matek Cloud

Current / Active

- Server setup and deployment
- Cloud setup
- Hosting
- Web hosting
- Email hosting
- Domain services
- DNS-related setup
- Virtual/server infrastructure where applicable

Build / Developing

- Managed cloud
- Cloud migration
- Cloud optimisation
- Virtualisation services
- Backup and disaster recovery offerings
- Hosted infrastructure packages
- Broader IaaS capability

Future Direction

- IaaS
- Managed cloud platform
- VPS / dedicated infrastructure
- Colocation/data-centre services
- Storage-as-a-Service
- DRaaS
- Edge computing and broader digital infrastructure

Customer outcomes

- Reliable hosting and compute; accessible digital infrastructure; managed server/cloud environments; continuity and recoverability.

03 — D'Foundry

Current / Active

- Web development
- Custom software development
- Web applications
- Business application development
- System integration
- Automation/integration work
- Digital solution development

Products / Ventures

- QADPAY — D'Matek-owned fintech product/venture associated with Foundry. It is not automatically a separate company today.
- Customer-specific applications such as the previously discussed Blessed Water application remain customer projects unless deliberately developed into reusable products.

Build / Developing

- Reusable software platforms
- SaaS offerings
- Workflow automation products
- Industry-specific digital solutions
- AI-enabled products and automation
- API/integration products

Future Direction

- Product companies; SaaS businesses; vertical technology businesses; independent software ventures.

Customer outcomes

- Digital tools, automation, business systems, customer experiences and technology products built around specific problems.

04 — IléMesh

Current / Active / Identified

- Smart home deployments
- CCTV
- Access control
- Smart locks
- IoT integration
- Hospitality technology integration
- IPTV integration
- DSTV / Pay-TV integration where part of a hotel/building technology solution
- Room technology and automation where delivered
- Connected physical systems

Hospitality / Building Technology

- Access cards / RFID
- Elevator floor-level access control where cards determine permitted floors
- Room power management where the card activates room lighting/power
- Hotel room IPTV / TV control
- Hotel room automation
- CCTV and security-system integration
- Access control and smart locks
- Building automation
- Energy management
- HVAC / lighting / occupancy integration

- Digital signage
- AV / meeting-room technology

Partner / Outsourced Today

- Smart homes, solar inverter, IPTV and DSTV have been identified as active areas where some delivery may currently be outsourced. Outsourcing does not change the intended business territory; it changes delivery ownership/capability maturity.

Build / Developing

- Smart buildings
- Connected facilities
- Smart hospitality packages
- Energy monitoring and management
- Broader IoT solutions
- Intelligent environments

Customer outcomes

- Safer buildings; more intelligent spaces; automated rooms; connected hospitality experiences; controlled access; integrated physical technology; better facility visibility.

05 — Matek Emporium / Matek Provision

Current / Active

- Gadget sales
- IT equipment sales
- Phones and devices
- Laptops/computers and related equipment
- Networking/IT equipment supply
- Accessories and technology products
- Project equipment procurement

B2B / Build

- Corporate procurement
- Vendor/channel partnerships
- Technology sourcing
- Equipment deployment
- Technology supply for D'Matek projects
- Distribution capability

Future Direction

- Regional technology distribution
- B2B marketplace
- Device-as-a-Service / Hardware-as-a-Service
- Leasing and lifecycle services
- Refurbished technology
- Technology logistics and financing

Naming status

- Matek Emporium and Matek Provision remain the two working finalists. Emporium leans toward a technology destination/retail model; Provision leans toward B2B sourcing, procurement and distribution.

06 — D'Matek Assurance

Current / Active

- Technology consulting/advisory
- IT architecture and assessment
- Managed IT support where currently delivered
- Cybersecurity/firewall-related services
- Technology operations support
- Customer technology management/support

Advisory

- IT strategy
- Technology architecture
- IT audit
- Risk and governance
- Compliance/GRC
- Digital transformation
- Procurement/vendor advisory

Managed Services / Build

- Outsourced IT department model
- Helpdesk
- Remote/onsite support
- Infrastructure management
- Cloud management
- Endpoint/device management
- Workspace management
- Monitoring and maintenance

Cybersecurity / Build

- Security assessment
- Security architecture
- Network security
- Endpoint security
- Identity and access management
- Vulnerability management
- Penetration testing
- Managed security
- SOC/SIEM/MDR direction

Customer outcomes

- A trusted technology partner that helps the customer understand, manage, secure, operate and continuously improve its technology environment.

Cross-Division Solutions

One-stop-shop examples

- Hotel IT department / managed IT
- Network + Wi-Fi + internet + firewall
- Server/cloud + hosting + backup
- CCTV + access control + smart locks + elevator access
- Hotel room automation + IPTV/TV control + room power
- Software + infrastructure + cloud + managed support
- Corporate technology procurement + deployment + ongoing management

How to assign ownership

- Infrastructure owns the connectivity layer; Cloud owns compute/hosting/storage; Foundry owns software/products/integration; IléMesh owns connected physical environments; Commerce owns sourcing/supply; Assurance owns advisory/managed operational responsibility and cybersecurity.

Current vs Future Discipline

Do not present every opportunity in the opportunity register as a current product or service.

A future capability can be strategically important without being commercially ready.

Partner-delivered or outsourced services should be clearly distinguished from capabilities D'Matek fully owns and delivers internally.

The commercial architecture should eventually turn this register into formal service catalogues, packages, pricing and sales offers.
